

Homework — Day 2: File & Directory Management

Task 1: Create a directory tree:

- - /tmp/cli_course/practice/{a,b,c}/{1,2,3} (use mkdir -p)

Task 2: Populate files:

- - touch files in various subdirs, e.g. fileA.txt, fileB.log

Task 3: Move/Copy:

- - copy all .txt files to /tmp/cli_course/texts
- - move all .log files to /tmp/cli_course/logs

Task 4: Clean up:

- - safely delete directories created (use rm -r after checking).
- Deliverable: A short README.txt listing commands you ran and output of `ls -R /tmp/cli_course`.
