Final Exam — Day 13: Comprehensive Practical

Part A — Tasks (Bash):

- - Provide a script that backs up a folder and prunes old backups.
- - Create a script that parses a log and outputs top 10 frequent error types.

Part B — Tasks (PowerShell):

- - Provide a PowerShell script that lists services and exports stopped services to a CSV.
- - Write a pipeline that reads a csv and filters rows with a condition.
- Part C — Short theory questions.
- Scoring guidance included in the PDF.
